Dracula   Dracula PRO

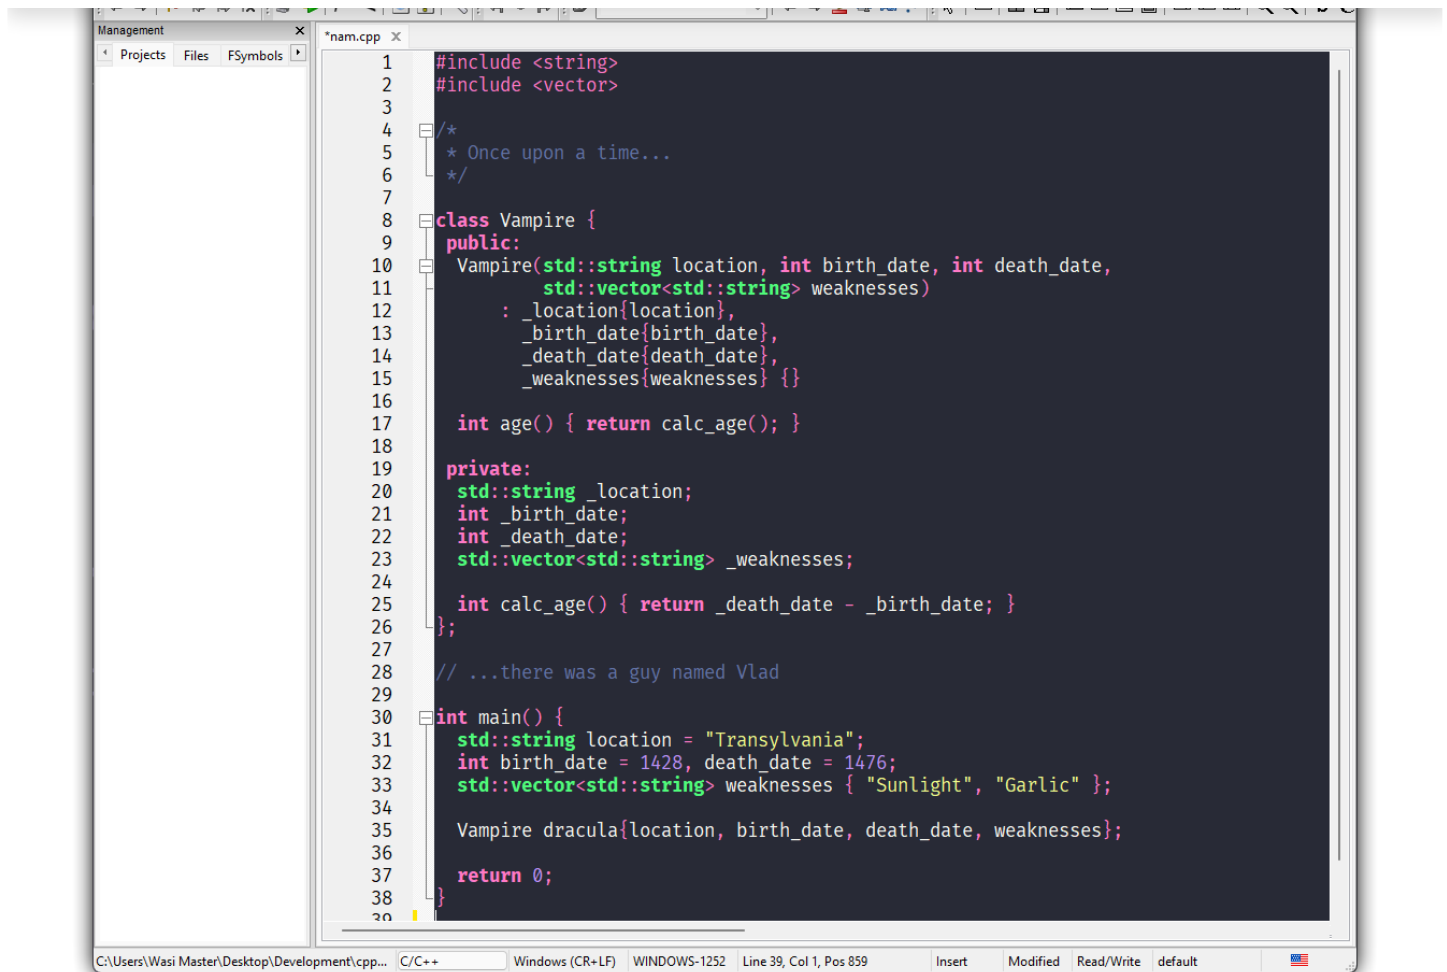

Dracula

Dark theme for Code::Blocks and 318+ apps

| ⊙ Star	20,654		⊙ Fork	2,156

Code::Blocks

## To Install

- Download the dracula.conf file.

- Open Codeblocks share config

  - **Windows**
    - Open C:\Program Files\CodeBlocks\cb_share_config.exe depending on where you installed codeblocks
    - Or you can Go to start (Press ⊞ Win) then type "Codeblocks Share Config"
    - Run the application by pressing ↵ Enter or clicking on it's icon with the mouse

  - **Linux**
    - Open ~/.codeblocks/cb_share_config depending on where you installed codeblocks, you may also want to run it as sudo

Dracula   Dracula PRO

- Navigate to where you downloaded the dracula.conf file, it will be most likely in the downloads folder

- Click the two check boxes that appear

Dracula   Dracula PRO

- Navigate to the default.conf file of Codeblocks, the location will differ by OS, If you can't find it, you should try creating a new project so that it gets created again.

  - **Windows**
    - The location in Windows is C:/Users/<User Name>/AppData/Roaming/Codeblocks/default.conf (%APPDATA%/Codeblocks/default.conf)
    - The AppData folder is by default hidden by Windows Explorer.
      - On Windows 10, Go to the "View" tab at the top and check the "Hidden items" checkbox
      - On Windows 11, Click the "View" icon at the top then hover over "Show" and check the "Hidden items" checkbox

 - **Linux** - The location in Linux is ~/.config/codeblocks/default.conf
  - **MacOS**
    - The location in MacOS is ~/Library/Application Support/codeblocks/default.conf
    - The Library folder is by default hidden by the most recent version of Mac OS. You could use ⌘ Command + ⇧ Shift + G to navigate to hidden folders.
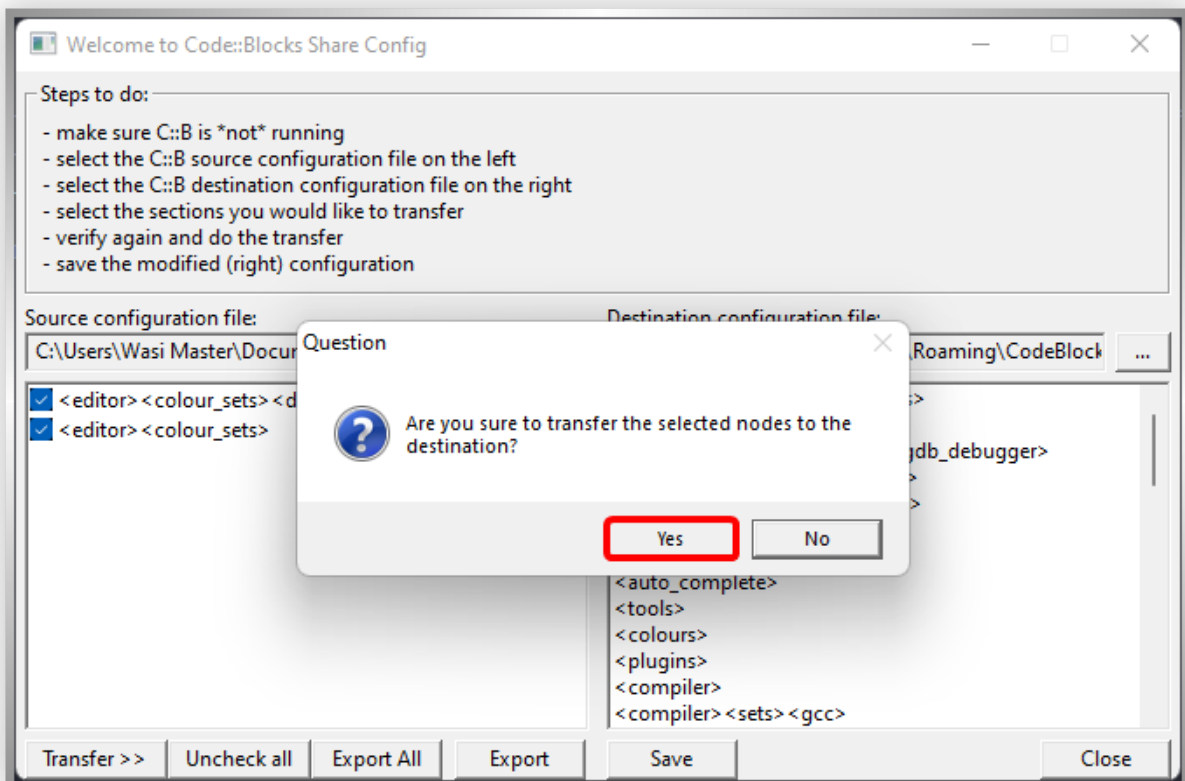

- Now click on the Transfer >> Button
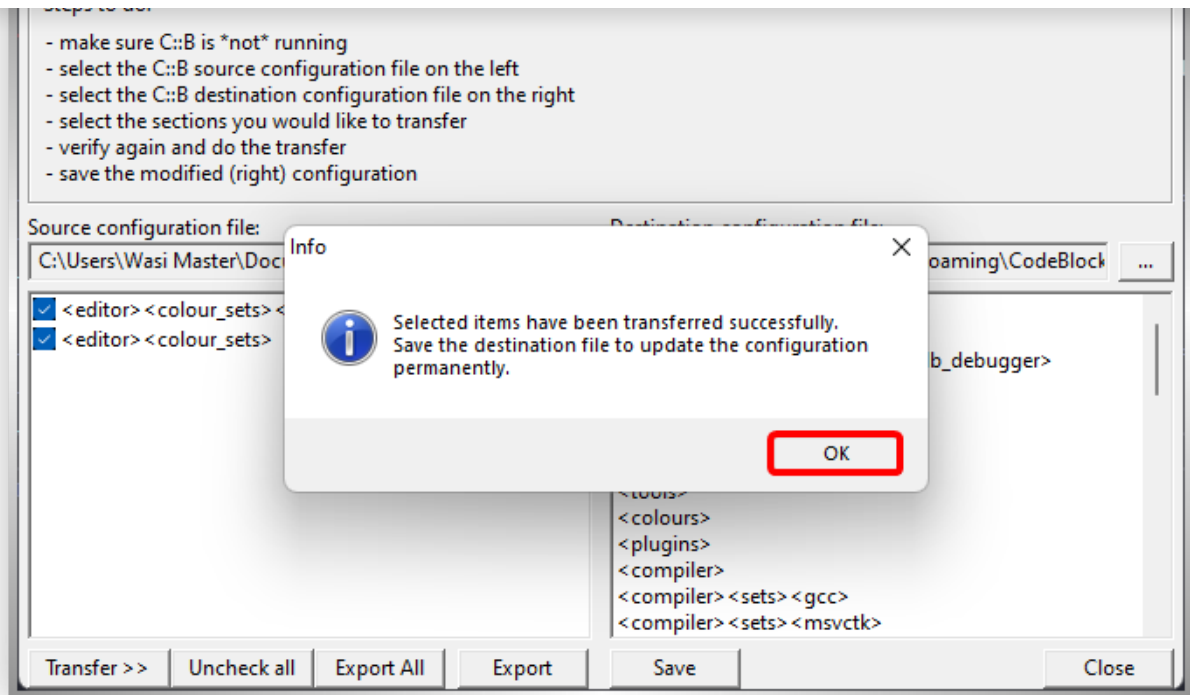

- Click Yes

- Then you'll see a message like this, press Ok

- Then press Save and voilà, you've just installed the theme

Activating theme
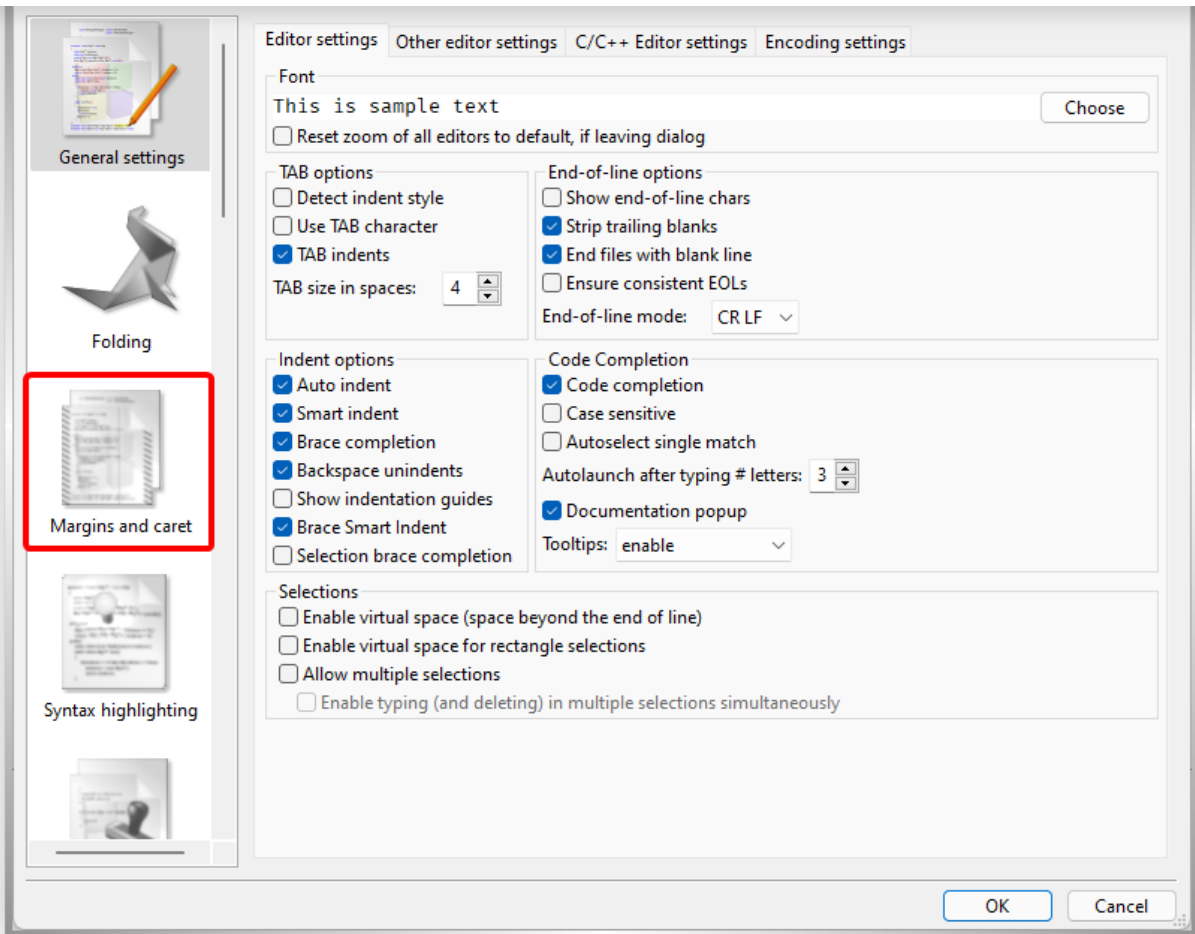

The theme should be automatically applied, if not, Go to Settings then Editor then Syntax Highlighting and set the Colour Theme to dracula

You should also change your cursor color to white

- Click Settings

- Click Margins and caret

Dracula

Dracula PRO

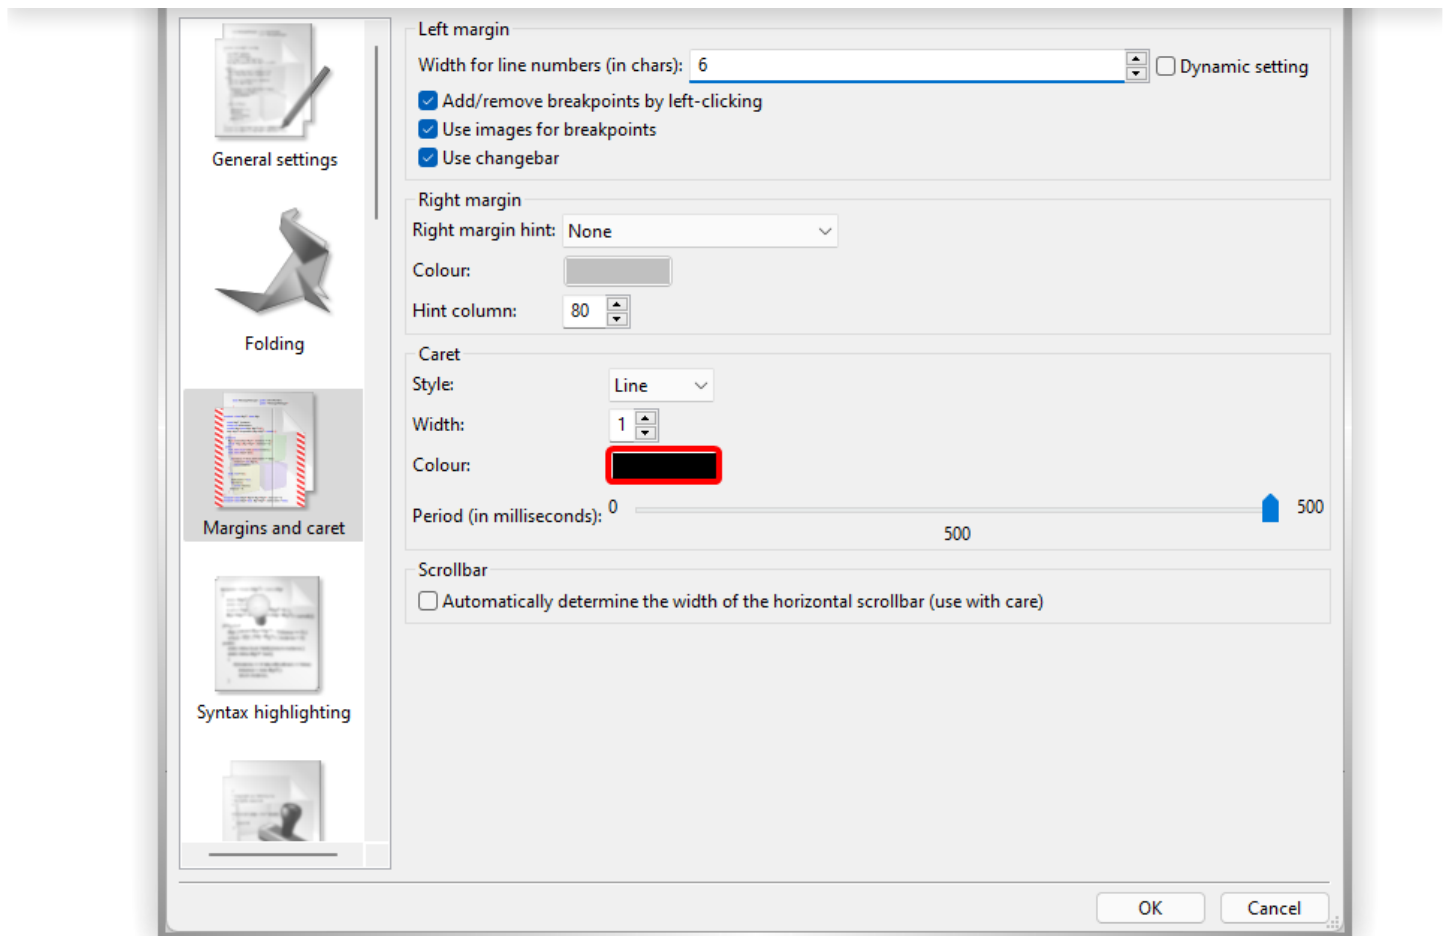

- Click on the color
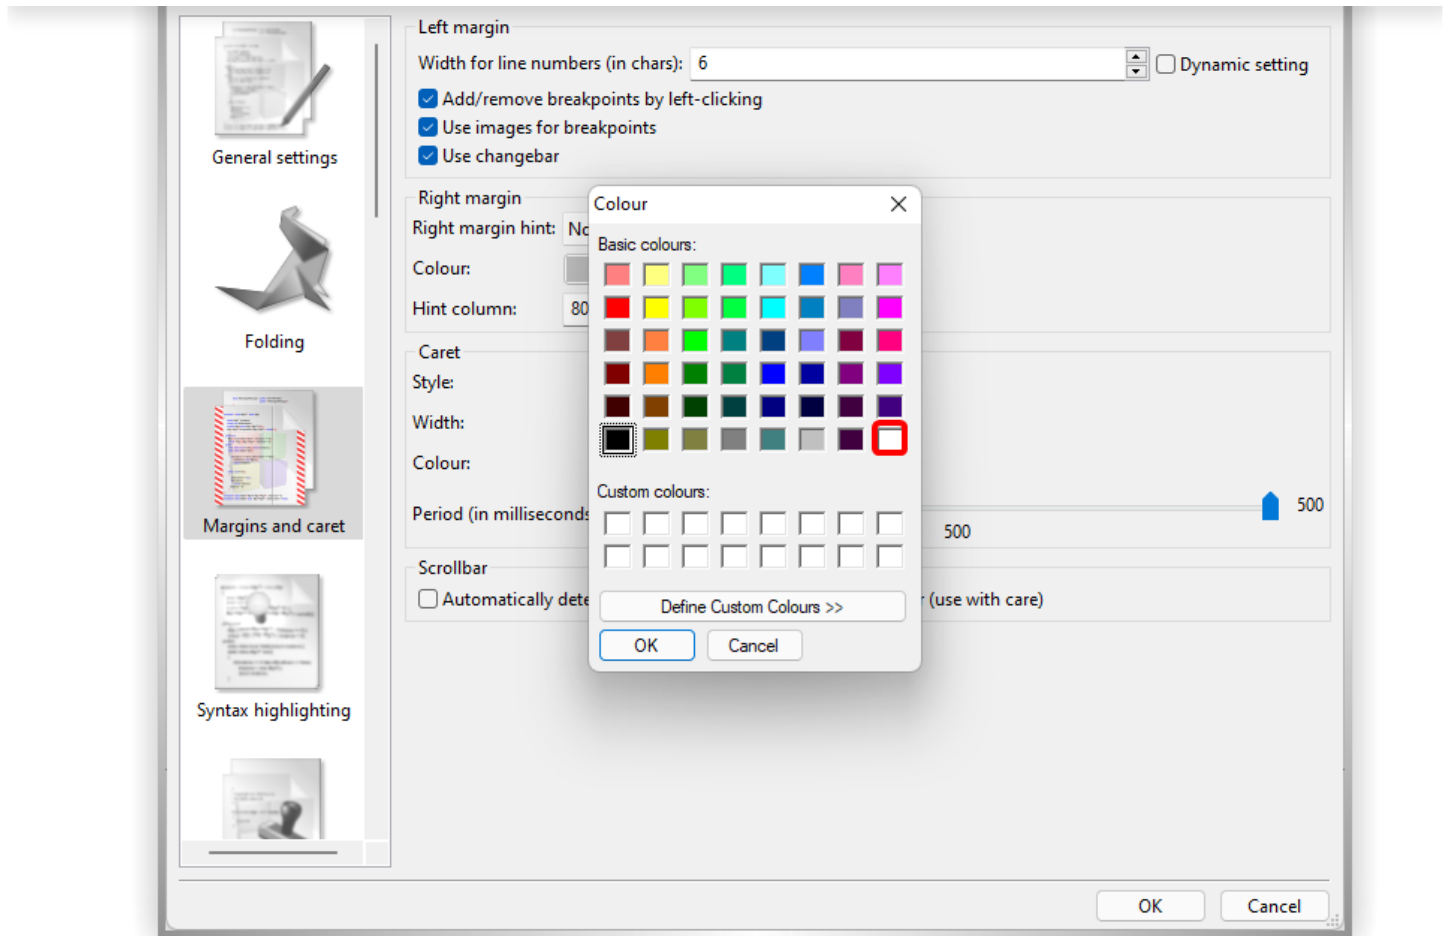

# Dracula   Dracula PRO
